OVERVIEW

Kaloud style charcoal is one pressed disc, scored into three or four wedges, that fills a Lotus style heat management device from edge to edge without gaps or stacking. A single disc takes the place of three cubes, lights as one piece, and spreads heat evenly over the bowl for around 110 minutes. It is pressed from coconut shell to the same 80% fixed carbon and 1.9% white ash spec as the rest of the shisha range. K3 separates into three slices, K4 into four.

The values shown are contract specs. Per-lot figures are confirmed on the batch CoA when the container is loaded.
